Scott Gangemi

sg.

Hey there,

I'm Scott. I'm a full stack developer and I'm passionate about building cool applications, and seeing the impact of awesome work.

My favourite thing about software development is creating fantastic experiences that people will love, and want to keep coming back to.

Experience

Domain　　　　　　**Feb 2018 - Now**
Javascript Developer (Full Stack)

My key accomplishment has been to transition to Full Stack Developer, working across React and Node codebases.

- Building React components, and solving problems on several Node servers.

APG & Co.　　　　　　**2016 - 2017**
Junior Web Developer

Some of my teams best accomplishments were:

- Redesigned our bloated six page checkout into a sleek one page wonder.
- Tore out all of our old CSS and converted it to SASS (cutting off 300kb in the process).
- Rewrote thousands of lines of mystery JavaScript into easy to understand React.

Domain　　　　　　**Apr 2017 - Feb 2018**
Front End Developer

The most important achievement my team and I worked towards was:

- Rebuilding Domain's listings pages and transitioning away from a legacy monolith code base.

Volunteering

NodeGirls

I've mentored and taught at NodeGirls a number of times and have:

- Mentored individuals in an Express class.
- Helped to organise and run a React workshop.

Education

UTS　　　　　　**2012 - 2015**

Bachelor of Integrated Product Design: Major in Interaction Design

Skills

I'm really comfortable with:

- HTML
- CSS
- JavaScript
- React
- Express
- Node

I'm currently working on:

- Python
- C#
- Learning computer science fundamentals
- Building stuff and learning new things.
