# Scott Gangemi

sg.

## Hey there,

I'm Scott. I'm a front end developer + designer and I'm passionate about solving cool problems, teaching, and seeing the impact of awesome work.

I'm interested in designing and creating fantastic experiences that people will love, and then want to experience again and again.

**Call me**
0431 987 232

**or don't.**

## Experience

**2016 - Now**
**APG & Co. - Junior Web Developer**
My team and I have done some great things, including:
- Redesigned our bloated six page checkout into a sleek one page wonder
- Tore out all of our old CSS and converted it to SASS (cutting off 300kb in the process)
- Rewrote thousands of lines of mysterious JavaScript into glorious, understandable React

**Apple, Inc.**   **2010 - 2016**
- Sold people products to help them solve their problems
- Learnt how to take apart and repair Apple products
- Trained new staff one on one and in groups, and mentored them
- Empathised with customers, and helped with their issues

## Education

**2012 - 2015**
**UTS**
Bachelor of Integrated Product Design: Major in Interaction Design
- Made a lot of design prototypes
- Threw 95% of them away
- Learnt to polish the good, and refine the bad through honesty and user interviews
- Worked hard to provide a great UX on my designs
- Learned a lot about innovating to solve problems

## Skills

- HTML
- CSS
- JavaScript
- jQuery
- React
- Redux
- Node.js
- Ideation
- Salesforce
- Adobe CC Suite
- UX Design
- Customer Interviews
- MongoDB
